Client Reference: ACTION FOR GLOBAL HEALTH

Client Relation Synopsis

The relation between EEPA and Action for Global Health is project based.

In 2007 EEPA implemented the following activities:

- Did research and drafted a report on funding for Health: An Unhealthy Prognosis? The EC's development funding for health. May 2007, Brussels, Belgium. ISBN 97-890-788610-27
- Did research and drafted Section 2: Europe's contributions to the Health MDGs for Action for Global Health's report: Health Warning. Why Europe must act now to rescue the health Millennium Development Goals, published by Action for Global Health, July 2007

In 2008 EEPA implemented the following activities:

- Revision of reports on national spending on health in EU member states as published in the Action for Global Health report: Health Warning. Why Europe must act now to rescue the health Millennium Development Goals , March 2008
- Co-organised the Roundtable on The EU's contribution to Health as a tracer sector: getting a grip on new and innovative aid co-ordination mechanisms for health. April 2008
- Analysis of the activities developed by the Action for Global Health partners linking them with the network's 12 goals as a contribution to Action for Global Health's evaluation report. June 2008

In our cooperation EEPA has delivered sound work of high quality, proving solid in-depth knowledge combined with a sharp analytical approach. The reports it submitted were comprehensive, showing a clear understanding not only of EU policies but also of its funding mechanisms, particularly in relation to health in development cooperation.

In relation to the events organised by EEPA in cooperation with Action for Global Health, EEPA's good contacts within the EU institutions and their extensive network among Civil Society Organisations have contributed to the success of an efficiently organised event.
